Response to Amendment

The reply filed on Nov. 3,2003 is not fully responsive to the prior Office action because of the following omission(s) or matter(s): the amendment raises issues with respect to enablement in regard to accounting being relevant which Applicant objects to as not being germane. Examiner very strongly asserts that B2B transactions, as the amended terminology implies that a buyer is a corporation, cannot exist in a vacuum, that accounting according to GAAP must apply and refund accounts must be set up on both sides of the transaction. Thus a refund business transaction, as this case hinges on, cannot exist outside of the accounting framework to account for profits and loses and eventual reporting to the IRS and is thus necessary for refund account enablement. Applicant is respectfully reminded that under current case law, In re Venner (MPEP 2144.04 III: Automating a Manual Activity) where a process that was done manually and converted to an automation or internet procedure is not novel. See 37 C.F.R. 1.111(c): "... or the objections made." (here the Applicant's assertion of accounting not being germane is the objection referred to). Since the abovementioned reply appears to be bona fide, applicant is given a time period of **ONE** (1) MONTH or THIRTY (30) DAYS from the mailing date of this notice, whichever is longer, within which to supply the omission or correction in order to avoid abandonment. Extensions of this time period may be granted under 37 C.F.R. 1.136(a). The Patent Office is now under a quality initiative as well as expeditious prosecution initiative.
